Officer Seek Information In Deer Poaching Investigation(s) In Bountiful

September 09, 2011

Davis County

On August 7, 2011 Utah Division of Wildlife Conservation Officer Wyatt Bubak was called to Bountiful City in order to investigate a deer found dead in the back yard of a local residence.

It is fairly common to find deer in this area that have died from natural causes or injuries suffered from a collision with a vehicle. However, a necropsy was performed and it was determined this deer had been killed illegally, using archery equipment. It is believed the deer was between 2150 south and San Simeon Way and 750 east and 900 east when it was initially shot.

The backyards in the area where the deer was found dead, and initially thought to have been shot, have very little to no fencing. Young children frequent the wooded area and would be at risk of any weapons being used. Also, Bountiful City does not allow any type of weapon to be discharged within city limits.

This deer was illegally killed in Bountiful City earlier this month. Individuals with any information are encouraged to contact the DWR at the numbers listed on this flyer

This is the third deer suspected of being illegally killed in the city of Bountiful since June.

If anybody has information regarding this issue, they are encouraged to contact Officer Wyatt Bubak, Sergeant Keith Fullenkamp, or the Utip Hotline (800)-662-3337. Rewards are available and requests for confidentiality are respected.
